Approved Electives for the Graduate Portfolio Program in Applied Statistical Modeling

Last Updated 4/14/2017

Choose two courses from Category 2 or one course from Category 1 and one from Category 2.

Orange highlight = offered Spring 2018

Category 1
- EDP 380C.4: Correlation and Regression Modeling
- M 384E: Design and Analysis of Experiments
- M 384G: Regression Analysis
- ORI 390R: Regression and Analysis of Variance
- PSY 384K: Advanced Statistics: Experimental Design
- PSY 394T: Regression Analysis
- SDS 384.6: Design and Analysis of Experiments
- SDS 384.4: Regression Analysis
- SDS 385.12: Applied Regression
- STA 380.10: Mathematical Statistics for Applications
- STA 380: Statistical Computer Packages

Category 2
- BIO 384K: Bayesian Modeling
- BIO 384K: Muddyboots Statistics
- CE 387T: Decision, Risk, and Reliability
- CE 392R: Discrete Choice Theory Modeling
- CE 397: Acquisition and Analysis of Transport Data
- CH 382L: Advanced Physical Chemistry: Statistical Mechanics
- CS 380N: Data Mining: A Statistical Learning Perspective
- CS 391D: Data Mining: Mathematical Perspective
- CS 395T: Computational Statistics with Application to Bioinformatics
- EDP 380D.4: Psychometric Theory and Methods
- EDP 380P: Item Response Theory
- EDP 380P: Computerized-Based Testing
- EDP 382K: Advanced Statistical Modeling
- EDP 382K: Applied Bayesian Analysis
- EDP 382K: Factor Analysis
- EDP 382K: Analysis of Categorical Data
- EDP 380C.12: Survey of Multivariate Methods
- EDP 380C.14: Structural Equation Modeling
- EDP 380C.16: Hierarchical Linear Modeling
- EDP 381C.12: Meta-Analysis
- EE 380L: Introduction to Pattern Recognition and Computer Vision
- EE 380L.10: Data Mining
- EE 380N: Stochastic Control Theory
EE 381J: Probability and Stochastic Processes I
EE 381M: Probability and Stochastic Processes II
GEO 383D: Numerical Methods I: Computational Methods Geological Sciences
ME 388H: Nuclear Safety and Security
NEU 385L: Bootstrap Statistics
ORI 390R.3: Time Series Modeling/Analysis/Control
ORI 390R: Reliability Theory and Modeling
ORI 390R.5: Applied Stochastic Processes
ORI 390R: Queueing Theory
ORI 390R: Systems Simulation
ORI 390R.16: Markov Decision Processes
ORI 391Q: Stochastic Optimization
ORI 390R.17: Decision Analysis
ORI 397: Nuclear Safety and Security
PA 388K: Evaluation of Social Policy and Programs
PSY 384T: Advanced Applied Statistics I
PSY 384T: Advanced Applied Statistics II
PSY 384T: Structural Equation Modeling
PSY 394U: Bootstrap Statistics
SOC 384M: Evaluation of Social Policy in Latin America
SOC 385K: Social Statistics: Discrete Multivariate Models
SOC 386L: Social Statistics: Dynamic Models and Longitudinal Data Analysis
SOC 395J: Structural Equation Models of Health and the Life Course
SDS 383C: Statistical Modeling I
SDS 383D: Statistical Modeling II
SDS 384: Bootstrap Statistics
SDS 384.7: Bayesian Statistical Methods
SDS 385: Analysis of Categorical Data
SDS 385.6: Hierarchical Linear Models
  SDS 385: Survival Analysis/Duration Modeling
  SDS 385: Social Statistics: Discrete Multivariate Models
SDS 385: Social Statistics: Dynamic Models and Longitudinal Data Analysis
SDS 385: Modern Statistical Methods
SDS 385K: Longitudinal Analysis
SDS 386C: Computational and Statistical Learning
SDS 386D: Monte Carlo Methods in Statistics
SDS 387: Linear Models
SDS 389: Time Series and Dynamic Models
SDS 395: Applied Microeconometrics
STA 380: Applied Multivariate Methods
STA 380: Bayesian Econometrics
