Connecting to the CNS Stats Server
Windows 7

Note: In order to connect to the Stats server, you must either be on-campus or connected to the UT VPN service. You can find additional information about connecting to the VPN service.

1. Open the Start Menu by left-clicking on the Start Button in the lower, left-hand corner of the screen.
2. Once the Start Menu appears, type “Remote Desktop” in the search field to search for the connection utility, as shown in the image to the right.
3. In the search results, left-click on “Remote Desktop Connection” under the “Programs” heading. The program icon and name should appear similar to the highlighted result in the image to the right.

4. In the connection utility window that opens, enter the name of the CNS stats server:
   wincompute.cns.utexas.edu
5. Left-click on the “Connect” button to initiate a remote desktop session with the CNS Stats Server as shown in the image to the right.

6. A window will then pop-up prompting for credentials. Left-click on the option to “Use Other Credentials.”
7. Enter your credentials in the form of “Austin\YourEID” for the username and your standard EID password for the password.
8. Left-click on “OK” to finalize the connection to the CNS Stats server.
9. You should then be presented with a logon banner as with any other lab computer. Left-click “OK” to accept the Acceptable Use Agreement and you should then be presented with the desktop of the CNS Stats Server.
