UT Summer Statistics Institute

Instructions for Mplus Installation

Below you will find the link for downloading a demo copy of Mplus for use at our Summer Statistics Institute. Please note, this license is only a temporary license for the Summer Statistics Institute and is available for Windows, Mac OS X and Linux Operating Systems.

Students should bring a personal laptop with basic Excel installed. The software package Mplus will be used for exploring and providing support for structural models.

Free Mplus demo version (with certain limitations) available for download at:
<http://www.statmodel.com/demo.shtml>.

For more information on the Mplus program, check out <http://www.statmodel.com>.

Note: Demo Version 8 is not available for Windows XP/ME/Vista, Mac OS X 10.6 Snow Leopard, Mac OS X 10.7 Lion and 32-bit Linux operating systems.
