

Certificate in Scientific Computation and Data Sciences Course Requirements (2018–2020 Catalog)

Policies and Procedures

- Total of 18 hours (six courses in sections II. – V. below) **must be completed with a grade of C- or higher.**
- No transfer credit or credit-by-exam may be used to fulfill certificate course requirements (except for prerequisite).
- Not all courses listed in this document are offered every semester. See UT course schedule for available class offerings.
- See SDS website for information on how to enroll and for more details about course and research project requirements: <http://stat.utexas.edu/undergraduate/certificate-in-scientific-computation>

I. Prerequisite Knowledge (choose one)

Mathematics: 408D Sequences, Series, and Multivariable Calculus, 408M Multivariable Calculus

II. Core Requirements

A. Computer Programming (choose one)

Statistics & Data Sciences: 322 Intro to Scientific Programming

Aerospace Engineering: 301 Intro to Computer Programming

Biomedical Engineering: 303 Intro to Computing

Computer Science: 313E Elements of Software Design

Electrical Engineering: 312 Software Design & Implementation

Geological Sciences: 325J Programming in FORTRAN & MATLAB

B. Mathematics (choose one)

Statistics & Data Sciences: 329C Practical Linear Algebra I

Mathematics: 427 K Advanced Calculus for Applications, 340L Matrices & Matrix Calculations, 341 Linear Algebra & Matrix Theory

III. Scientific Computing Courses (choose two categories & take one course in each)

A. Numerical Methods

Statistics & Data Sciences: 335 Scientific & Technical Computing

Aerospace Engineering: 211K Engineering Computation

Civil Engineering: 379K Computer Methods for Civil Engineering

Chemical Engineering: 348 Numerical Methods in Chemical Engineering

Computer Science: 323E Elements of Scientific Computing, 323H Scientific Computing-Honors, 367 Numerical Methods

Mathematics: 348 Scientific Computation in Numerical Analysis, 368K Numerical Applications

B. Statistical Methods

Statistics & Data Sciences: 325H Honor Statistics, 320E Elements of Statistics, 328M Biostatistics

Biomedical Engineering: 335 Engineering, Probability, & Statistics

Economics: 329 Economic Statistics

Electrical Engineering: 351K Probability & Random Processes

Mathematics: 358K Applied Statistics, 378K Intro to Mathematical Statistics

Mechanical Engineering: 335 Engineering Statistics

C. Other Computing Topics

Statistics & Data Sciences: 329D Practical Linear Algebra II, 374C Parallel Computing, 374D Distributed & Grid Computing for Sci. & Engineers, 374E Visualization & Data Analysis

Computer Science: 324E Elements of Graphics & Visualization, 327E Elements of Databases, 329E Topics in Elements of Computing*, 377 Principles & Applications of Parallel Programming

**Topics courses must be approved by the faculty committee. See SDS website for details on approval process.*

Continued on next page

Mathematics: 346 Applied Linear Algebra, 362M Introduction to Stochastic Processes, 372K PDE & Applications, 376C Methods of Applied Mathematics

Mechanical Engineering: 367S Simulation Modeling

Management Information Systems: 325 Database Management

Neuroscience: 366M Quantitative Methods

Mining

Finance/Statistics (IROM): 372.6/372 Optimization Methods in Finance

Geological Sciences: 325K Computational Methods in Geological Sciences

Mathematics: 375T Topics in Mathematics*, 374M Mathematical Modeling in Science & Engineering

Physics: 329 Introduction to Computational Physics

**Topics courses must be approved by the faculty committee.*

See SDS website for details on approval process

IV. Applied Computing Courses (choose one)

Statistics & Data Sciences: 322E Elements of Data Science, 348 Computation Biology & Bioinformatics

Aerospace Engineering: 347 Intro to Computational Fluid Dynamics

Biology: 321G Intro to Computational Bio, 377J Computational Biology Lab

Biomedical Engineering: 341 Engineering Tools for Computational Genomics Lab, 342 Computational Biomechanics, 346 Computational Structural Biology, 377T Topics in Biomedical Engineering*

Computer Science: 329E Topics in Elements of Computing*

Chemistry: 368 Advanced Topics in Chemistry

Economics: 363C Computational Economics

Electrical Engineering: 361M Introduction to Data

V. Research Project (One course to reach 18 total hours for certificate)

Statistics & Data Sciences: 379R, 479R Undergraduate Research

Work with a faculty supervisor on an original research project that is presented in a research paper. Topics must be approved by SDS Faculty Committee prior to enrollment. Students are responsible for finding their own faculty supervisor. See our website for more information
