

Research Registration Form Scientific Computation Portfolio

To register for the SDS portfolio research course, print and fill in the information on this form. Once both the student and supervising faculty member have signed below, scan and email it with a one-page description of the research plan to Dr. Bindu Viswanathan:

bindu@austin.utexas.edu

This completed form must be received at least <u>two weeks prior to the first day of class</u> for the semester the research will be conducted to be considered for approval. Once approved, we will register you for SDS 389R during the next open registration period.

The following documents will be due (emailed to the above address) by the last class day of that semester, or as otherwise communicated by the portfolio coordinator:

- 1. Cover page that includes your title, name, the name and signature of your faculty research advisor, the semester of study, and the text "Completed for Portfolio in Scientific Computation" (see website for cover page template).
- 2. One-page single-spaced executive summary/abstract of your project.
- 3. Ten to fifteen page single-spaced scholarly paper that provides a general introduction, a clear description of your research methods and results, and a concluding discussion section.
